

EMBRAER LEGACY 650

IDEA

The aim was to make a complete update of the aircraft interior - designing it for frequent flights. Our designers worked closely together with the client to understand their vision, so the result was a stylish, durable, and timeless interior.

INTERIOR
REFURBISHMENT
PROJECT

TRANSFORMATION

Our team worked extensively to refurbish this Legacy 650 in a tight schedule. All seats received foam updates and were re-upholstered in silky smooth and resistant perfect gray leather.

The client has chosen elegant diamond stitching for the classy and modern seat look.

Extensive works

The multi-tonal divan linen added a casually refined nuance to the interior. The artisanal textile created a cosy atmosphere above the skies.

All metal parts were re-plated in Satin Ultrablack colour.

We re-upholstered the lower sidewall panels with new UltraLeather. The textured, matte finish with a subtle geometric pattern blend perfectly with the overall palette. The headline got stain resistant, durable and easy of care material with inherent EPA-registered antimicrobial protection.

Our skilled team revarnished all wooden panels to high black gloss with a wooden effect, providing a harmonious contrast in the cabin.

Before & After

Before & After

SCOPE OF WORK

- **Seats re-upholstery** with new leather
